Neuropsychological Evaluation Summary

SYNTHETIC SAMPLE. Fictional student for software testing.

Patient: Jordan Avery Test | Age at testing: 15 years 2 months | Dates of testing: 05/04/2026 and 05/11/2026

Examiner: Dana Okafor, PhD (fictional), Licensed Psychologist

Cognitive Testing (WISC-V)

Index	Standard Score	Percentile
Full Scale IQ (FSIQ)	104	61
Verbal Comprehension (VCI)	112	79
Working Memory (WMI)	86	18
Processing Speed (PSI)	79	8

Academic Achievement (WIAT-4)

Composite	Standard Score
Written Expression	81
Reading Comprehension	101
Math Problem Solving	97

Diagnostic Impressions

1. Attention-Deficit/Hyperactivity Disorder, combined presentation. 2. Specific learning disorder with impairment in written expression. 3. Rule out generalized anxiety disorder; parent and self-report elevations warrant follow-up.

Recommendations

Referral to child and adolescent psychiatry for medication evaluation. Extended time and reduced-distraction setting for testing. Assistive technology for writing. Teacher ADHD rating scales should be collected before the psychiatry visit.
